

ARON Direct three-phase meter

MKB - 363 M**ARON - 400**

Electronic three-phase energy meter with direct ARON connection energy for DIN rail mounting

**Description**

Electronic three-phase energy meter with direct ARON connection energy for DIN rails

Other features include:

- Mechanical 7 digit display: 6 whole numbers + 1 decimal
- Assembly on a 4 module DIN rail
- 2 digital outputs

Application

- Energy control in three-phase installations with no neutral where the efficient use of space is important, for example: installations with motors
- In applications with severe temperature conditions. The working life of the unit's mechanical display is not affected by high temperatures.

Features

Voltage circuit	400 Vac phase-phase $\pm 20\%$ (between L1-L3)
Consumption	4 V·A
Frequency	45..0.65 Hz
Current circuit (only phases L1 and L3)	
Nominal current (I_n)	63 Aac
Maximum current	90 Aac
Minimum current	0.4 % I_n
Maximum meter value	999,999.9 kWh
Accuracy	Class 2 - IEC 1036 and EN-61036
Maximum current	0,8%
Base current (IN)	0,8%
5% IN	1,4 %
Output transistor (optoisolated - open collector)	
Maximum switching voltage	35 Vdc
Maximum switching current	30 mA
Output time	4 imp / h
Energy output	100 impulses / kW·h
Impulse duration	100 ms
Ambient conditions	
Operating temperature	-10 ... +45 °C
Humidity (non-condensing)	25...75%
Build features	
Minimum display resolution	100 W·h
Type of box	Modular DIN rail. Self-extinguishing plastic
Degree of protection	IP 20
Dimensions	70 x 85 x 70 mm (4 modules)
Weight	300 g
Safety	
Designed for category II, in accordance with EN 61010	
Standards	
IEC-1036, EN-61036, EN 61010
